

UNIQUE.

Your Supply Chain Optimizer

Holistic digitization from ifm.

A professional portrait of Björn Dunkel, Managing Director. He is a middle-aged man with a shaved head and a well-groomed beard, smiling warmly at the camera. He is dressed in a dark grey pinstriped suit, a white dress shirt, and a vibrant red tie. He is sitting on the wooden deck of a rusted metal train car, with his hands clasped in his lap. The background is a large industrial facility, likely a factory or a railway workshop, with various pieces of machinery and structural elements visible. The lighting is soft and directional, highlighting the man's features and the texture of his clothing.

BJÖRN DUNKEL
Managing Director

OUR VISION? GLOBAL SUCCESS. FOR US AND FOR YOU!

WE OPTIMIZE FOR YOUR SUCCESS

Success is not a doorway – it's a staircase. That's how American sales trainer Dottie Walters put it, at least. Of course, there are no shortcuts on the path to success – but with a powerful partner by your side, you'll be able to climb the stairs faster. Optimizing logistics processes is a major guarantee of success for a company.

With the SAP-certified solutions from GIB, you can make your supply chain management faster and easier to monitor while adapting it to match your requirements precisely. The result: Stock optimization, increased supply capability, a higher level of service, and thus increased profit. Take several steps in one stride.

INTEGRATED
UNIQUE!

THE END-TO-END SOLUTIONS FROM GIB ARE FULLY INTEGRATED INTO SAP

Optimization is not the time for half measures. If you want to be successful, you need a strong partner by your side, one who offers you integrated solutions instead of selective optimizations. Our products are unique around the globe in that they are integrated seamlessly into SAP and certified, and cover the whole supply chain in the process – from production level to management.

Create processes that work as if from a single source, offering optimum transparency at the same time. And that means beyond the borders of application areas, plants or countries, too.

A STRONG
PARTNER FOR
YOUR SUPPLY
CHAIN.

FAR BEYOND
IMPLEMENTATION.

YOUR SUCCESS IS OUR MOTIVATION

Your processes, requirements, and goals are our priority. We'll uncover potential areas of optimization in the process chain in a constructive, collaborative process with you, finding tailor-made solutions to suit your needs.

Whether you're looking for long-term consultation or just for one project – depending on your preferences and requirements, we can help you make the leap from “one-hit wonder” to permanent success. Support is often required as early as the SAP roll-out phase. The parameters and settings should be properly defined in order to carry out targeted ACTUAL analyses. Following a quick and standardized implementation phase, our

experienced consultants will be there to assist you further should you require their expert help, thus allowing you to make logical adjustments and updates as part of a continuous improvement process. This way, we optimize both the validity of the information generated and your lasting success with our solutions. With our motto “Our customers' success brings us success, too,” we put all our efforts into optimizing processes, recognizing potential, and making your company more successful. Worldwide.

INTEGRATED DIGITIZATION WITH GIB

If you want to sustainably optimize your supply chain processes, you need a holistic digitization approach, instead of applying tunnel vision to individual areas. With the solutions from GIB, you benefit from a process-based solution approach with an integrated planning process. This allows digitization to be implemented across all business processes by linking production and management level with SAP ERP as the leading system.

User-friendliness is not just a nice extra for us, but rather a core component of a promising application. That is why we value transparency, clarity, and simplification. Together with forward-looking process maturity, based on solid basic technology and system-internal intelligence, GIB offers you a holistic approach to the digitization of your processes.

EXPERIENCE
MEETS
INNOVATION

A SUCCESS STORY

Founded in June 1992, the success story of GIB was already taking shape as the fledgling company sought to ensure optimum use of customers' IT systems. While still working as a consulting partner for IBM, we soon recognized that optimum use meant more than simply installing the software correctly. In close cooperation with our customers, we saw that the installed software rarely met the requirements of users. Poor displays and media disruptions inspired us to create a solution in which you could complete all of those important tasks in your day-to-day work quickly and with transparency.

We found an ideal basis during our intensive research in SAP and on that foundation we developed the GIB Suite, which enhances the standard SAP functions with full integration.

After launching the first application "Operations" in 2003, the GIB ABAP Programming Templates soon followed within a few years, as did other applications such as "Controlling," "Planning," "Forecast," "VMI," and "Buying."

We've always viewed the seamless integration into the SAP system as the cornerstone of our success to date. That is why we've been a certified SAP software partner since 2006 and proud SAP Silver Partner since 2015. Our software, too, is certified: the GIB Suite has been "Powered by SAP NetWeaver" since 2006 and has also been certified for SAP S/4HANA since 2018.

STRONG PARTNER BY YOUR SIDE

Since 2018, GIB has been a 100% subsidiary of the ifm group of companies, the global leader of automation and sensor technology in Essen. With this strong partner by our side, we're breaking new ground in the Internet of Things and Industry 4.0 with the GIB Shop Floor Integration. Together with the applications WCM and KPI-Tower, we are synonymous with integrated solutions with maximum user-friendliness in forward-looking topics, too.

OUR EMPLOYEES
ARE LIKE OUR
PRODUCTS:
UNIQUE!

SUCCESSFUL TOGETHER

A special byname has long been established among our long-standing customers, one which we're proud to carry: the GIB family. With our now 120 employees, we see ourselves as a family company where community and the contribution of every single employee is appreciated. Because their potential and commitment is the basis for our success – past, present, and future.

In order to define and achieve our common goals for a successful and secure future, GIB continues to foster cooperation

based on partnership and trust so that the best-possible conditions for innovative and forward-looking ideas can be created.

Throughout our company's history, we've seen over and over that human interaction is key to coming up with these ideas. New solutions which drive, inspire, and make our daily work successful have been and continue to be developed through dialogue and knowledge-sharing.
